

# Space Captain

(lyrics/music Matthew Moore)

Once I was traveling across the sky  
This lovely planet caught my eye  
And while being curious I flew close by  
And now I'm caught here till I die

Until we die, until we die  
We're just learning to live together  
Learning to live together  
Learning to live together

I lost my memory of where I've been  
We all forgot we could fly  
Someday we all change into peaceful man  
And we'll return into the sky

Until we die, until we die  
We're just learning to live together  
Learning to live together  
Learning to live together  
Till we die

Until we die, until we die  
We're just learning to live together  
Learning to live together  
Learning to live together  
We got to get in together  
It's getting better and better  
We got to get in together  
It's getting better and better
