

World on fire
(lyric/music Ruud Weber)

The heat is rising out of control
Men of god, we don't wanna know
Somebody tell me, what are they fighting for?

The world is on fire
The world is on fire

Feeding fear of the other men
Drive us apart as far as they can
Fighting for power, playing their games

Talk is cheap it don't mean a thing
With children dying there's no explaining
Don't tell me there's a god leading this way

The world is on fire
The world is on fire
The world is on fire
The world is on fire

In the name of this, in the name of that
What kind of god makes you do these things?
Somebody tell me will we ever learn?
The world is on fire
The world is on fire
The world is on fire
The world is on fire
Time after time all over again
I just can't believe that it's happening still
The past don't seem to change us, it all stays the same
The world is on fire
The world is on fire
The world is on fire
The world is on fire
